BRISTOL COMMUNITY ENERGY LIMITED
STRATEGIC REPORT FOR THE YEAR ENDED 30 APRIL 2021

The directors present their strategic report for the year ended 30 April 2021.

Principal activity

The cooperative's principal activities are:

- to enable meaningful cuts in carbon emissions, and reduce dependence on unsustainable sources of energy.
- to fund and implement renewable energy and energy efficient measures, in collaboration with people, communities and businesses.
- to work co-operatively with people and communities to make carbon reduction technologies available to all regardless of financial resources, and support mutual action to respond to the challenges of climate change.

Fair review of the business

BEC was ten years old this year.

We're pleased that in this most challenging of years we've kept our staff safe, our energy assets generating, and channelled further funds into community benefit, whilst also progressing our project development, collaborations and relationship-building.

BRISTOL COMMUNITY ENERGY LIMITED

STRATEGIC REPORT FOR THE YEAR ENDED 30 APRIL 2021

Energy stats for the year (estimates):

Generated 0.5% of Bristol's electricity usage.

2,300 tCO₂ saved.

Solar roof hosts' savings on energy bills: £22,000.

We were proud to complete our latest fund-raise, for £2million, enabling us to further progress our Netham Weir hydro scheme, the microgrid at Water Lillies (in Kings Weston), additional rooftop solar schemes, and more battery storage.

We were also awarded a £1.15m grant by the European Regional Development Fund for our hydro scheme at Netham Weir. The grant funds have not been drawn down yet.

While government policy towards the renewables sector has continued to be contradictory, and particularly unhelpful towards the specific community energy sector, we have this year seen the business sector considerably ramp up its net-zero ambition and engagement. As a result we're delighted to be developing some in-depth relationships with a number of commercial organisations, and look forward to working closely with them over the coming year.

Bristol City Council's City Leap procurement for a joint-venture energy partner is also nearing its conclusion, and once in place should provide a significant boost to the city's net-zero implementation plans. BEC has been part of a community consortium which has engaged with the three final bidders on how they can best include the community in their bid submissions.

For a number of years our co-op has led on the development of Zero West -a collaboration to accelerate the zero-carbon transition in the West of England region. It brings together the commercial sector, the community sector and the 4 local authorities. Zero West is not part of the BEC Group, but we continue to help the initiative flourish because working with others on climate change is one of the principal activities in our primary rules.

Zero West has made significant progress this year. In collaboration with the Transport for Greater Bristol Alliance it launched the Moving Bristol Forward campaign for clean, affordable, accessible and efficient transport in Greater Bristol. This campaign has generated real engagement with the public and politicians. A full update on Zero West activity is available at:

<https://bristolenergy.coop/wp-content/uploads/2021/10/Zero-West-intro-Oct-2021.pdf>

Looking forward

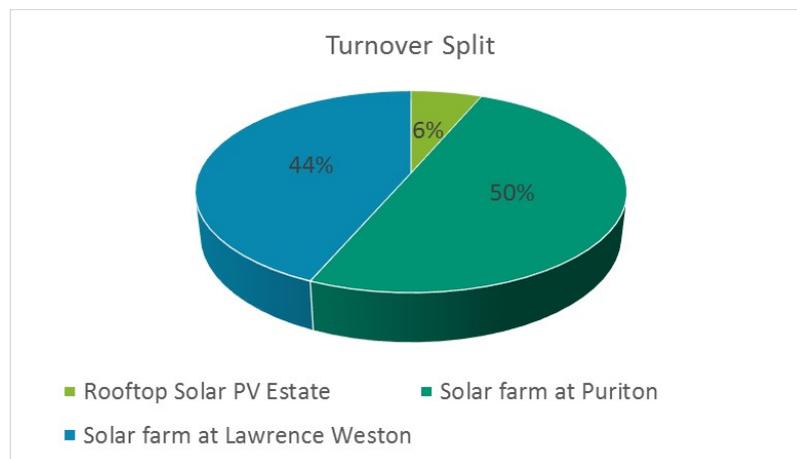

There's no doubt however that the coming year will provide its challenges. Brexit and Covid-19 have led to supply chain crises and significant cost increases in many sectors, including construction. In the coming months we will know more clearly the financial impact this will have on the schemes we are currently developing.

Review of the financial year

Turnover

Consolidated turnover increased by 6.7% to £1.25m, compared to £1.17m in 2019/20. At present, BEC's turnover is predominantly (94%) derived from its two ground mounted solar farms in the South West of England.

BRISTOL COMMUNITY ENERGY LIMITED
STRATEGIC REPORT FOR THE YEAR ENDED 30 APRIL 2021

The positive year-on-year increase in turnover was largely attributable to:

- the annual RPI indexing of Feed-In Tariffs. BEC's financial model is such that income streams are typically RPI linked at a minimum whilst, by contrast, a large proportion of costs e.g. debt servicing costs, is protected from inflationary increases. In contrast to the significant increases seen in recent months, wholesale electricity prices over the course of 2019/20 were unremarkable, such that the Feed-in Tariffs prevailed for the full financial year.
- the favourable UK weather of Spring 2020, which saw electricity generation across BEC's two solar farms increase by an average of 0.3%.
- the addition of BEC's first unsubsidised yet largest rooftop solar PV installation at Bristol Indoor Bowls Club, bringing the portfolio of rooftop solar PV systems to over 500 kWp, with more in the pipeline.

Gross Profit

Gross profit increased year-on-year, rising 16.7% to £557k. This stemmed from the aforementioned increase in turnover, further enhanced by an improvement in margin from 51% to 55% in 2020/21, reflecting good control of asset operating & maintenance costs and a reduction in direct costs associated with the pilot Lovedon Fields Grid battery project.

BRISTOL COMMUNITY ENERGY LIMITED
STRATEGIC REPORT FOR THE YEAR ENDED 30 APRIL 2021

Administrative Expenses

Administrative expenses increased by £86k since 2019/20. With BEC's ambitious plans for the coming years, there is appeal in achieving further reductions in our cost of capital, in particular debt servicing, in order to release cashflow for more value-adding activities. As such, in May 2020, BEC re-financed a £819k bank loan within its wholly owned subsidiary, Severn Community Energy One CIC, resulting in a reduction in the average interest rate from 8% to 4.1%. This resulted in one-off fees of £109k being incurred in 2021, partly offset by a £23k saving in interest for the period as the lower rate started to manifest. The projected interest saving over the next 5-year period is £146k, of which £30k will accrue in the 2021/22 financial year. Further, the absence of the one-off refinancing fees in the following financial year will be beneficial.

Administrative expenses also included £90k of expenditure in connection with BEC's seventh successful community share offer, which raised £2.075m in early 2021.

Employment costs increased by £30k to £117k in 2021 as BEC continues to expand its team and thus its capability to accelerate Bristol's transition to net zero.

Community Fund

Once again we contributed revenue (£25,000) from our energy assets into the Megawatt Community Energy Fund which we run with Low Carbon Gordano.

Alongside the Megawatt Fund, BEC also provided £8,831 to Ambition Lawrence Weston (our partner in the Lawrence Weston solar farm).

Operating profit

Operating profit, which is the remaining surplus after deducting administrative expenses but before interest on borrowings and share capital, amounted to £167k, a figure slightly improved from the previous year's operating profit of £146k. Once interest costs are deducted, the net loss for the year was £297k, down from £386k in 2019/20. It is worth noting that net losses are anticipated in the earlier phase of our clean energy assets' lifecycles, owing to:

- Costs of raising share capital are prudently expensed via the Profit & Loss Account upfront rather than spread over the useful economic life of the projects that are funded by that capital.
- Assets are depreciated on a straight-line basis whilst operating profits from the existing portfolio are forecast to increase year-on-year.
- BEC does not currently adopt a revaluation policy for its fixed assets.

Looking forward

BEC's financial performance is and will continue to be affected by many, often interlinking, variables, including inflation, the price of electricity, weather (irradiance), raw material & construction costs and both the availability and cost of finance. Despite the inherent risks, current indicators coupled with our scenario modelling indicates BEC is well placed to navigate the prevailing uncertainties and there are many reasons to be optimistic:

- Whilst irradiance levels in 2021/22 to date haven't quite matched those of the previous year, BEC is set to capitalise from the recent notable rise in wholesale electricity prices. With Power Purchase Agreements (PPA) now in place until 2023 for both solar farms and select rooftop solar PV systems, income projections in the short-term look strong.
- The combination of contractual PPA arrangements, operating cost reductions & the re-financing of some of our bank debt instruments means BEC is projected to generate a surplus before shareholder interest payments and share offer costs within the next two financial years. It is further encouraging that operating profits on the two solar farms are projected to increase by 4%* over the next 5 years, and this increase could be notably higher if high electricity prices persist.

*the safety net of the Feed-in Tariff providing a good degree of confidence in projections.

BRISTOL COMMUNITY ENERGY LIMITED

STRATEGIC REPORT FOR THE YEAR ENDED 30 APRIL 2021

- Our pipeline of project opportunities, and contexted within an increasingly conducive environment (more capital flowing into renewables, broader acceptance of the urgency and scale of the climate problem and an increasing awareness of the specific benefits of “community energy”), our focus is now very much on how we maximise our impact over the next 10 - 20 years.
- Most of BEC’s clean energy assets are set to generate economic, environmental and social benefits over a 20-30 year lifetime, possibly beyond, but we need to be bold now to scale more future benefits in the face of the ever more apparent climate catastrophe that would prevail under a “do nothing” scenario. This requires a sophisticated balancing act of ambitious yet informed investment decisions, a deep awareness of risks and sensitivities (over such long timeframes, variables such as inflation & interest can prove very material) all within a framework of prudent yet agile financial management. BEC already has the know-how and an eagerness to grow in order to promptly harness new opportunities to deliver positive change in a financially viable manner.
- We will continue to measure success in terms of financial performance, tonnes of carbon saved (an increasingly problematic metric as the grid decarbonises) and community benefit, including energy bill savings. Over the coming year we intend to introduce a number of more sophisticated key performance Indicators.

Principal risks and uncertainties

In BEC’s operations the principal uncertainty is prevailing energy prices although the business is substantially shielded by its existing installations having FiT accreditation and receiving guaranteed inflation-linked minimum income for the rest of their FiT term. As BEC grows, a greater percentage of its portfolio will not have this backing and the business will be more subject to commercial market forces.

In terms of growth, the main risk is potential difficulty in establishing viable business cases for new projects. Against this, the downward ‘Learning Cost Curve’ for many renewables technologies is steeper than many predictions and seems robust going forward making solar and battery installation increasingly cheaper. However, slow evolution of government strategy and local energy plans, and inertia in energy regulation is likely to continue to slow project roll-out, particularly on more innovative schemes.

Approved by the Board on 13 October 2021 and signed on its behalf by:

A M O'Brien
Company secretary and director

BRISTOL COMMUNITY ENERGY LIMITED
DIRECTORS' REPORT FOR THE YEAR ENDED 30 APRIL 2021

The directors present their report and the consolidated financial statements for the year ended 30 April 2021.

Directors of the group

The directors who held office during the year were as follows:

A M O'Brien - Company secretary and director

P Thompson - Chairman

H Ridgeon (ceased 24 August 2020)

A Lee

D Radice

C J Speller

D Douglas (ceased 13 May 2020)

B Adebajo (appointed 14 May 2020)

S Pyne (appointed 20 May 2020)

K Blacklaws (appointed 27 May 2020)

Financial instruments

Objectives and policies

The group is financed through a combination of fixed term borrowing and issued bonds.

Price risk, credit risk, liquidity risk and cash flow risk

The group minimizes its liquidity risk by managing these balances through a combination of cash flow review and regular credit control which ensures that the group can meet its liabilities as they fall due. The group's bankers receive regular information to ensure that the banking facilities are adequately secured which ensures that as far as possible the banking facilities are ongoing.

The group is sensitive to interest rates because of its bank borrowings and maintains a close working relationship with its bankers to ensure that the borrowings are structured appropriately at the lowest rates.

Our turnover is predominantly related to long term agreements for energy production so we have pre-agreed payment terms on most trade debt. We pay our suppliers within agreed payment terms, and in many cases by direct debit to maintain good supplier relationships.

We cover the risk of an unusually large number of investor bond redemption requests affecting our cashflow through the requirement that investors must give six months' notice of redemption. This allows us the time to raise additional funds, if required, through a share offer or loan from one of our banking partners.

Disclosure of information to the auditor

Each director has taken steps that they ought to have taken as a director in order to make themselves aware of any relevant audit information and to establish that the company's auditor is aware of that information. The directors confirm that there is no relevant information that they know of and of which they know the auditor is unaware.

Future Developments

The future developments of the business are included within the strategic report.

BRISTOL COMMUNITY ENERGY LIMITED
DIRECTORS' REPORT FOR THE YEAR ENDED 30 APRIL 2021

Company secretary and director

BRISTOL COMMUNITY ENERGY LIMITED
STATEMENT OF DIRECTORS' RESPONSIBILITIES

The directors acknowledge their responsibilities for preparing the Annual Report and the financial statements in accordance with applicable law and regulations.

Company law requires the directors to prepare financial statements for each financial year. Under that law the directors have elected to prepare the financial statements in accordance with United Kingdom Generally Accepted Accounting Practice (United Kingdom Accounting Standards and applicable law). Under company law the directors must not approve the financial statements unless they are satisfied that they give a true and fair view of the state of affairs of the company and of the profit or loss of the company for that period. In preparing these financial statements, the directors are required to:

- select suitable accounting policies and apply them consistently;
- make judgements and accounting estimates that are reasonable and prudent;
- state whether applicable UK Accounting Standards have been followed, subject to any material departures disclosed and explained in the financial statements; and
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the company will continue in business.

The directors are responsible for keeping adequate accounting records that are sufficient to show and explain the company's transactions and disclose with reasonable accuracy at any time the financial position of the company and enable them to ensure that the financial statements comply with the Companies Act 2006. They are also responsible for safeguarding the assets of the company and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

BRISTOL COMMUNITY ENERGY LIMITED

INDEPENDENT AUDITOR'S REPORT TO THE MEMBERS OF BRISTOL COMMUNITY ENERGY LIMITED

Opinion

We have audited the financial statements of Bristol Community Energy Limited (the 'parent company') and its subsidiaries (the 'group') for the year ended 30 April 2021, which comprise the Consolidated Profit and Loss Account, Consolidated Statement of Comprehensive Income, Consolidated Balance Sheet, Balance Sheet, Consolidated Statement of Changes in Equity, Statement of Changes in Equity, and Notes to the Financial Statements, including a summary of significant accounting policies. The financial reporting framework that has been applied in their preparation is applicable law and United Kingdom Accounting Standards, including Financial Reporting Standard 102 'The Financial Reporting Standard applicable in the UK and Republic of Ireland' (United Kingdom Generally Accepted Accounting Practice).

In our opinion the financial statements:

- give a true and fair view of the state of the group's and the parent company's affairs as at 30 April 2021 and of the group's loss for the year then ended;
- have been properly prepared in accordance with United Kingdom Generally Accepted Accounting Practice; and
- have been prepared in accordance with the requirements of the Companies Act 2006.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (UK) (ISAs (UK)) and applicable law. Our responsibilities under those standards are further described in the Auditor's responsibilities for the audit of the financial statements section of our report. We are independent of the group in accordance with the ethical requirements that are relevant to our audit of the financial statements in the UK, including the FRC's Ethical Standard, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Conclusions relating to going concern

In auditing the financial statements, we have concluded that the director's use of the going concern basis of accounting in the preparation of the financial statements is appropriate.

Based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the company's ability to continue as a going concern for a period of at least twelve months from when the original financial statements were authorised for issue.

Our responsibilities and the responsibilities of the directors with respect to going concern are described in the relevant sections of this report.

BRISTOL COMMUNITY ENERGY LIMITED

INDEPENDENT AUDITOR'S REPORT TO THE MEMBERS OF BRISTOL COMMUNITY ENERGY LIMITED

Other information

The directors are responsible for the other information. The other information comprises the information included in the annual report, other than the financial statements and our auditor's report thereon. Our opinion on the financial statements does not cover the other information and, except to the extent otherwise explicitly stated in our report, we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If we identify such material inconsistencies or apparent material misstatements, we are required to determine whether there is a material misstatement in the financial statements or a material misstatement of the other information. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact.

We have nothing to report in this regard.

Opinion on other matter prescribed by the Companies Act 2006

In our opinion, based on the work undertaken in the course of the audit:

- the information given in the Strategic Report and Directors' Report for the financial year for which the financial statements are prepared is consistent with the financial statements; and
- the Strategic Report and Directors' Report have been prepared in accordance with applicable legal requirements.

In the light of our knowledge and understanding of the group and the parent company and their environment obtained in the course of the audit, we have not identified material misstatements in the Strategic Report and the Directors' Report.

Matters on which we are required to report by exception

We have nothing to report in respect of the following matters where the Companies Act 2006 requires us to report to you if, in our opinion:

- adequate accounting records have not been kept by the parent company, or returns adequate for our audit have not been received from branches not visited by us; or
- the parent company financial statements are not in agreement with the accounting records and returns; or
- certain disclosures of directors' remuneration specified by law are not made; or
- we have not received all the information and explanations we require for our audit.

Responsibilities of directors

As explained more fully in the Statement of Directors' Responsibilities set out on page 10, the directors are responsible for the preparation of the financial statements and for being satisfied that they give a true and fair view, and for such internal control as the directors determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the directors are responsible for assessing the group's and the parent company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the group or the parent company or to cease operations, or have no realistic alternative but to do so.

BRISTOL COMMUNITY ENERGY LIMITED

INDEPENDENT AUDITOR'S REPORT TO THE MEMBERS OF BRISTOL COMMUNITY ENERGY LIMITED

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (UK) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

Irregularities, including fraud, are instances of non-compliance with laws and regulations. We design procedures in line with our responsibilities, outlined above, to detect material misstatements in respect of irregularities, including fraud. The extent to which our procedures are capable of detecting irregularities, including fraud is detailed below:

The extent to which the audit was considered capable of detecting irregularities including fraud

Our approach to identifying and assessing the risks of material misstatement in respect of irregularities, including fraud and non-compliance with laws and regulations, was as follows:

- the engagement partner ensured that the engagement team collectively had the appropriate competence, capabilities and skills to identify or recognise non-compliance with applicable laws and regulations;
- we identified the laws and regulations applicable to the company through discussions with directors and other management, and from our commercial knowledge and experience of the production of energy sector;
- we focused on specific laws and regulations which we considered may have a direct material effect on the financial statements or the operations of the company, including the Companies Act 2006, taxation legislation, data protection, anti-bribery, employment, environmental and health and safety legislation;
- we assessed the extent of compliance with the laws and regulations identified above through making enquiries of management and inspecting legal correspondence; and
- identified laws and regulations were communicated within the audit team regularly and the team remained alert to instances of non-compliance throughout the audit.

We assessed the susceptibility of the company's financial statements to material misstatement, including obtaining an understanding of how fraud might occur, by:

- making enquiries of management as to where they considered there was susceptibility to fraud, their knowledge of actual, suspected and alleged fraud; and
- considering the internal controls in place to mitigate risks of fraud and non-compliance with laws and regulations.

To address the risk of fraud through management bias and override of controls, we:

- performed analytical procedures to identify any unusual or unexpected relationships;
- tested journal entries to identify unusual transactions;
- assessed whether judgements and assumptions made in determining the accounting estimates were indicative of potential bias; and
- investigated the rationale behind significant or unusual transactions.

BRISTOL COMMUNITY ENERGY LIMITED
INDEPENDENT AUDITOR'S REPORT TO THE MEMBERS OF BRISTOL COMMUNITY ENERGY LIMITED

In response to the risk of irregularities and non-compliance with laws and regulations, we designed procedures which included, but were not limited to:

- agreeing financial statement disclosures to underlying supporting documentation;
- reading the minutes of meetings of those charged with governance;
- enquiring of management as to actual and potential litigation and claims; and
- reviewing correspondence with HMRC, relevant regulators including the Health and Safety Executive, and the company's legal advisors.

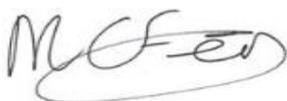

There are inherent limitations in our audit procedures described above. The more removed that laws and regulations are from financial transactions, the less likely it is that we would become aware of non-compliance. Auditing standards also limit the audit procedures required to identify non-compliance with laws and regulations to enquiry of the directors and other management and the inspection of regulatory and legal correspondence, if any.

Material misstatements that arise due to fraud can be harder to detect than those that arise from error as they may involve deliberate concealment or collusion.

A further description of our responsibilities for the audit of the financial statements is located on the Financial Reporting Council's website at www.frc.org.uk/auditorsresponsibilities. This description forms part of our auditor's report.

Use of our report

This report is made solely to the company's members, as a body, in accordance with Chapter 3 of Part 16 of the Companies Act 2006. Our audit work has been undertaken so that we might state to the company's members those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the company and the company's members as a body, for our audit work, for this report, or for the opinions we have formed.

BRISTOL COMMUNITY ENERGY LIMITED
NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 30 APRIL 2021

1 General information

The company is a private company limited by share capital, incorporated in England and Wales.

The address of its registered office is:

Foot Anstey LLP
2 Glass Wharf
Bristol
BS2 0FR
England

2 Accounting policies

Summary of significant accounting policies and key accounting estimates

The principal accounting policies applied in the preparation of these financial statements are set out below. These policies have been consistently applied to all the years presented, unless otherwise stated.

Statement of compliance

These financial statements were prepared in accordance with Financial Reporting Standard 102 'The Financial Reporting Standard applicable in the UK and Republic of Ireland'.

Basis of preparation

These financial statements have been prepared using the historical cost convention except that as disclosed in the accounting policies certain items are shown at fair value.

These financial statements are presented in Sterling (£).

Summary of disclosure exemptions

The group has adopted the exemption from requirement to present a statement of cash flows, related notes and from all other requirements of Section 11, 'Basic Financial Instruments' and Section 12, 'Other Financial Instruments Issues', where the equivalent disclosures are included in the consolidated financial statements of the group in which the entity is consolidated. in accordance with Paragraph 3.1B of the Financial Reporting Standard 102.

Basis of consolidation

The consolidated financial statements consolidate the financial statements of the company and its subsidiary undertakings drawn up to 30 April 2021.

BRISTOL COMMUNITY ENERGY LIMITED
NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 30 APRIL 2021

A subsidiary is an entity controlled by the company. Control is achieved where the company has the power to govern the financial and operating policies of an entity so as to obtain benefits from its activities.

The results of subsidiaries acquired or disposed of during the year are included in the Profit and Loss Account from the effective date of acquisition or up to the effective date of disposal, as appropriate. Where necessary, adjustments are made to the financial statements of subsidiaries to bring their accounting policies into line with those used by the group.

The purchase method of accounting is used to account for business combinations that result in the acquisition of subsidiaries by the group. The cost of a business combination is measured as the fair value of the assets given, equity instruments issued and liabilities incurred or assumed at the date of exchange, plus costs directly attributable to the business combination. Identifiable assets acquired and liabilities and contingent liabilities assumed in a business combination are measured initially at their fair values at the acquisition date. Any excess of the cost of the business combination over the acquirer's interest in the net fair value of the identifiable assets, liabilities and contingent liabilities recognised is recorded as goodwill.

Inter-company transactions, balances and unrealised gains on transactions between the company and its subsidiaries, which are related parties, are eliminated in full.

Intra-group losses are also eliminated but may indicate an impairment that requires recognition in the consolidated financial statements.

Accounting policies of subsidiaries have been changed where necessary to ensure consistency with the policies adopted by the group. Non-controlling interests in the net assets of consolidated subsidiaries are identified separately from the group's equity therein. Non-controlling interests consist of the amount of those interests at the date of the original business combination and the non-controlling shareholder's share of changes in equity since the date of the combination.

Going concern

The directors have considered the current financial performance of the company and the net current liabilities position. After reviewing the group's forecasts and projections, the directors have a reasonable expectation that the group will be profitable resulting in achieving a net asset position in the future and are confident that the company has adequate resources to continue trading for the foreseeable future. Taking into account the historical position with regards to bond repayment requests, and availability of other finance, the directors have a reasonable expectation that the group will continue to have working capital available for trade. The group therefore continues to adopt the going concern basis in preparing its financial statements.

Turnover recognition

Turnover comprises the fair value of the consideration received or receivable for the generation of electricity in the ordinary course of the company's activities. Turnover is shown net of sales/value added tax, returns, rebates and discounts.

The company recognises revenue when the amount of revenue can be reliably measured and it is probable that future economic benefits will flow to the entity.

BRISTOL COMMUNITY ENERGY LIMITED
NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 30 APRIL 2021

Tangible assets

Tangible assets are stated at cost, less accumulated depreciation and accumulated impairment losses.

The cost of tangible assets includes directly attributable incremental costs incurred in their acquisition and installation.

Depreciation

Depreciation is charged so as to write off the cost of assets, other than land and properties under construction over their estimated useful lives, as follows:

Asset class	Depreciation method and rate
Plant and machinery	straight line over 15 to 27 years
Furniture, fittings and equipment	33% straight line

Business combinations

Investments in associates are accounted for using the equity method of accounting, whereby the investment is initially recognised at the transaction price and subsequently adjusted to reflect the group's share of the profit or loss, other comprehensive income and equity of the associate.

Goodwill

Goodwill arising on the acquisition of an entity represents the excess of the cost of acquisition over the group's interest in the net fair value of the identifiable assets, liabilities and contingent liabilities of the entity recognised at the date of acquisition. Goodwill is initially recognised as an asset at cost and is subsequently measured at cost less accumulated amortisation and accumulated impairment losses. Goodwill is held in the currency of the acquired entity and revalued to the closing rate at each reporting period date. Goodwill is amortised over its useful life, which shall not exceed ten years if a reliable estimate of the useful life cannot be made.

Amortisation

Amortisation is provided on intangible assets so as to write off the cost, less any estimated residual value, over their useful life as follows:

Asset class	Amortisation method and rate
Goodwill	straight line over 27 years

Investments

Investments in equity shares which are publicly traded or where the fair value can be measured reliably are initially measured at fair value, with changes in fair value recognised in profit or loss. Investments in equity shares which are not publicly traded and where fair value cannot be measured reliably are measured at cost less impairment.

Interest income on debt securities, where applicable, is recognised in income using the effective interest method. Dividends on equity securities are recognised in income when receivable.

Cash and cash equivalents

Cash and cash equivalents comprise cash on hand and call deposits, and other short-term highly liquid investments that are readily convertible to a known amount of cash and are subject to an insignificant risk of change in value.

BRISTOL COMMUNITY ENERGY LIMITED
NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 30 APRIL 2021

Debtors

Trade debtors are amounts due from customers for merchandise sold or services performed in the ordinary course of business.

Trade debtors are recognised initially at the transaction price. They are subsequently measured at amortised cost using the effective interest method, less provision for impairment. A provision for the impairment of trade debtors is established when there is objective evidence that the group will not be able to collect all amounts due according to the original terms of the receivables.

Inventories

The cost of work in progress comprises direct materials and, where applicable, direct labour costs and those overheads that have been incurred in bringing the projects to their present location and condition. Development costs on new projects are carried forward to the extent that they are deemed recoverable. At each reporting date, projects are assessed for impairment. If projects are impaired, the carrying amount is reduced to its selling price less costs to complete and sell; the impairment loss is recognised immediately in profit or loss.

Creditors

Trade creditors are obligations to pay for goods or services that have been acquired in the ordinary course of business from suppliers. Trade creditors are classified as current liabilities if the group does not have an unconditional right, at the end of the reporting period, to defer settlement of the creditor for at least twelve months after the reporting date. If there is an unconditional right to defer settlement for at least twelve months after the reporting date, they are presented as non-current liabilities.

Trade creditors are recognised initially at the transaction price and subsequently measured at amortised cost using the effective interest method.

Borrowings

Interest-bearing borrowings are initially recorded at fair value, net of transaction costs. Interest-bearing borrowings are subsequently carried at amortised cost, with the difference between the proceeds, net of transaction costs, and the amount due on redemption being recognised as a charge to the Profit and Loss Account over the period of the relevant borrowing.

Interest expense is recognised on the basis of the effective interest method and is included in interest payable and similar charges.

Borrowings are classified as current liabilities unless the group has an unconditional right to defer settlement of the liability for at least twelve months after the reporting date.

Assets held under hire purchase agreements are capitalised as tangible fixed assets with the future obligation being recognised as a liability. Finance costs are recognised in the Profit and Loss Account calculated at a constant periodic rate of interest over the term of the liability.

Share capital

Ordinary shares are classified as equity. Equity instruments are measured at the fair value of the cash or other resources received or receivable, net of the direct costs of issuing the equity instruments. If payment is deferred and the time value of money is material, the initial measurement is on a present value basis.

BRISTOL COMMUNITY ENERGY LIMITED
NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 30 APRIL 2021

Defined contribution pension obligation

The group operates a defined contribution plan for its employees. A defined contribution plan is a pension plan under which the group pays fixed contributions into a separate entity. Once the contributions have been paid the group has no further payments obligations.

The contributions are recognised as an expense in the profit and loss account when they fall due. Amounts not paid are shown in accruals as a liability in the balance sheet. The assets of the plan are held separately from the group in independently administered funds.

Reserves

Called up share capital represents the nominal value of shares that have been issued.

Profit and loss account includes all current and prior period profits and losses.

Bank loan 2 is denominated in sterling with a nominal interest rate of 8% and repayable in instalments. The balance at the year end if £nil (2020 - £820,864).

Bank loan 3 is denominated in sterling with a nominal interest rate of 3.5 - 4.275% and repayable in instalments. The balance at the year end if £2,195,606 (2020 - £2,300,715).

Bank loan 4 is denominated in sterling with a nominal interest rate of 3.245 - 5.1% and repayable in instalments. The balance at the year end if £851,187 (2020 - £nil).

Bank loan 5 is denominated in sterling with a nominal interest rate of 4% and repayable in instalments. The balance at the year end if £2,782,678 (2020 - £2,929,183).

Loans and borrowings are secured by fixed and floating charges over all present and future assets of the group.

19 Commitments

Group

Other financial commitments

The total amount of other financial commitments not provided in the financial statements was £2,206,040 (2020 - £2,269,136).

The commitment is in respect of the rental and easement leases in relation to the subsidiary sites at SSB Puriton CIC and Severn Community Energy One CIC on which the companies constructed a solar park. These leases were signed in 2016 for terms of 25 to 30 years.

The above commitment has been calculated to uplift the initial rent to reflect an increase in the retail prices index (RPI). The operating lease commitment shown above assumes the RPI will rise by 3% per annum over the remaining lease terms.

BRISTOL COMMUNITY ENERGY LIMITED
